## DedTru® Centerless Grinding Product Line

The description of Unison Corporation's DedTru Centerless Grinding product line is presented in the following information. Please contact any member of our Marketing Department to request a detailed quotation for each machine.

### DedTru® Systems, 6x18 Grinder

**DedTru Centerless Grinding Systems (388-0000)** includes the DedTru Basic 6 x 18 Grinder with a hole through the column for longer parts; Model C DedTru Unit, dual sine base assembly, 3 hp spindle, coolant system with FilTru Tank Assembly and FilTru Coolant Settling Tank, 1/4" carbide blades for throughfeed (with guides), plunge and infeed work from 1/4" to 1-1/4" diameter, one part stop, one pressure roll assembly, work light and wheel guarding for up to 2" wide wheel. Arranged for 230 or 460 volt (when ordering specify voltage), 3 phase, 60 Hz power supply. For manual operation; maximum part diameter with optional accessories 4". (For diameters to 5" add increased height for grinder, page 9, and 078-0000 (page 6), for diameters from .031" to 1/4" (tooling accessories, page 5).

Shipping Weight and Dimensions: 1345 lbs/46" x 56" x 82" high

**DedTru Centerless Grinding System with Model PGF Unit (399-0000)** is the same as a Model 388-0000 except it is equipped with a Model PGF DedTru Unit with quick change 5" x 2" regulating roll. This system includes a dual sine base. Maximum part diameter with optional accessories 2-3/4". (For diameters to 5" add increased height for grinder, page 9 and Special Blade Holder and Rest Assembly, page6)

Shipping Weight and Dimensions: 1335 lbs/46" x 56" x 82" high

### DedTru® Centerless Units

**Model C DedTru Centerless Grinding Unit (050-0000 (metric))** with 4-1/4" x 4" wide regulating roll for use with customer's grinder. Includes Model C DedTru Unit, DC controller, sine base, 1/4" carbide blades (and guides) for throughfeed, infeed and plunge work for parts ranging from 1/4" to 1-1/4" diameter, part stop, pressure roll, infeed slide assembly, coolant pump and hose. Maximum part diameter is 5" with optional accessories.

Shipping Weight and Dimensions: 140 lbs/13" x 32" x 13" high

**Model C6 DedTru Centerless Grinding Unit (090-0000) with 6" x 6" wide regulating roll** for use with customer's grinder. Includes a Model C6 DedTru Unit, DC controller, sine base, 1/4" carbide blades and guides for throughfeed, infeed and plunge work for parts 1/4" to 1-1/4" diameter, part stop, pressure roll, infeed slide assembly, coolant pump and hose. Maximum part diameter with optional accessories is 4".

Shipping Weight and Dimensions: 175 lbs/35-3/4" x 15-3/4" x 12-1/2" high

**Model PGF DedTru Centerless Grinding Unit (141-0000)** with 5" x 2" wide regulating roll for use with customer's grinder. Includes Model PGF DedTru Unit, DC controller, sine base, 1/4" carbide blades for infeed and plunge work for parts 1/4" to 1-1/4" diameter, part stop, pressure roll, infeed slide assembly, coolant pump and hose. Maximum part diameter with optional accessories is 5".

Shipping Weight and Dimensions: 110 lbs/34" x 24" x 12" high

**Model IGF DedTru Internal Grinding Unit (350-0000)** includes a 5" x 2" wide regulating roll for use with customer's grinder. Also includes a DC controller, 1/4" carbide blade for ID grinding of parts 1/4" OD to 5" OD, part stop and pressure roll. NOTE: Contact factory for mounting dimensions.

## DedTru® Unit Tooling and Accessory Equipment

The prices in this section covers equipment for the DedTru Unit such as regulating rolls, blades, guides, work supports, etc which may be necessary to grind specific parts or a range of parts. These items are applicable to DedTru Centerless Grinding Systems and DedTru Units. Please refer to the specific descriptive specifications when ordering to assure proper part.

### REGULATING ROLLS

#### Model C

Standard 4" wide with steel core (use after s/n 434)  
050-0110

Standard 4" wide with 1" hole (use before s/n 434)  
\*\*063-0146

\*\*These are for older models. It is recommended that the DedTru Centerless Unit be updated. Refer to company for pricing.

#### Model C6

6" diameter by 6" wide (replacement part)  
090-6103

#### Model PGF

4" diameter x 2" wide with adaptor (replacement part for PGF s/n 330 and prior)  
140-0107

4" diameter x 3" wide with adaptor (replacement part for PGF s/n 330 and prior)  
140-1749

5" diameter x 2" wide with adaptor (replacement part for PGF s/n 331 and greater)  
140-1750

5" diameter x 3" wide with adaptor (replacement part for PGF s/n 331 and greater)  
140-1751

**Model PGF Regulating Roll Kit** includes a 4" diameter x 3" wide mounted regulating roll, 3" x 1/4" carbide blade, wiper and clamps.  
219-0000

**Model PGF Regulating Roll Kit** includes a 5" diameter x 3" wide mounted regulating roll, 3" x 1/4" carbide blade, wiper and clamps.  
319-0000

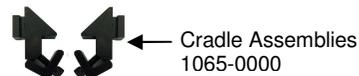

**Tool Kit for Changing Model C and C6 Regulating Roll**  
087-0000

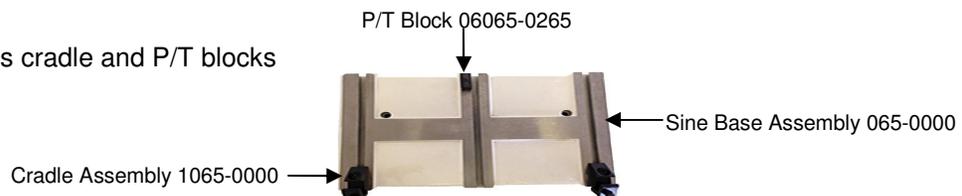

**Sine Bar Clamps** to further secure the sine bar and angle setting blocks in position.  
085-0000

**Cradle Assembly** - locks DedTru Grinding Fixture to sine base  
1065-0000

**Sine Base Assembly** includes cradle and P/T blocks  
065-0000

## DedTru® Unit Tooling and Accessory Equipment

### Work Blades – Carbide Tipped

#### Model C Work Blades

<u>Imperial</u>	<u>Metric</u>	<u>Thrufeed – 8” or 200mm</u>	<u>Plunge – 4” or 100mm</u>
1”	25.4 mm	(045-0190)	(045-0189)
1/4”	6.35 mm	(045-0192)	(045-0191)
1/8”	3.17 mm	(045-0194)	(045-0193)
1/16”	1.587 mm	(045-0196)	(045-0195)

For diameters below 1/16” use Graphmo Steel 4” long for thrufeed, plunge and infeed:  
 1/32” .038mm (044-0187)

**Complete Set of Blades and Guides** for part capacity from 1/32” to 2-1/4” diameter consisting of each of the 4” plunge and 8” thrufeed blade sizes (1”, 1/4”, 1/8” and 1/16”) and one 4” x 1/32” Graphmo only plus one each of the guides (1” (25.4mm), 3/64” (1.14mm), 3/32” (2.44mm), 1-16” (1.587mm) and 1/32” (0.38mm)).  
 045-0000

#### Model C6 Work Blades

<u>Imperial</u>	<u>Metric</u>	<u>Thrufeed – 10” or 254.0mm</u>	<u>Plunge – 6” or 152.4 mm</u>
1”	25.4 mm	(093-6154)	(093-6153)
1/4”	6.35 mm	(093-6156)	(093-6155)
1/8”	3.17 mm	(093-6158)	(093-6157)
1/16”	1.587 mm	(093-6160)	(093-6159)

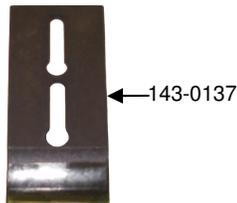

For diameters below 1/16” use Graphmo Steel 6” long for thrufeed, plunge and infeed:  
 1/32” .038mm (093-6161)

**Complete Set of Blades and Guides** for part capacity from 1/32” to 2-1/4” diameter consisting of each of the 6” plunge and 10” thrufeed blade sizes (1”, 1/4”, 1/8” and 1/16”) and one 6” x 1/32” Graphmo only plus one each of the guides (1” (25.4mm), 3/64” (1.14mm), 3/32” (2.44mm), 1-16” (1.587mm) and 1/32” (0.38mm)).  
 210-0000

#### Model PGF

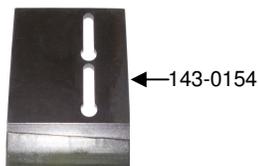

<u>Imperial</u>	<u>Metric</u>	<u>Plunge – 2” or 50.8mm</u>	<u>Infeed – 2” or 50.8mm</u>
1”	25.4 mm	(143-0134)	
1/4”	6.35 mm	(143-0135)	(197-0706)
1/8”	3.17 mm	(143-0136)	(197-0707)
1/16”	1.587 mm	(143-0137)	(197-0708)

For diameters below 1/16” use Graphmo Steel.  
 1/32” (0.38mm) (143-0133) (197-0704)

<u>Imperial</u>	<u>Metric</u>	<u>Plunge – 3” or 76.2mm</u>	<u>Infeed 3” or 76.2mm</u>
1”	25.4 mm	(143-0157)	
1/4”	6.35 mm	(143-0156)	(197-0715)
1/8”	3.17 mm	(143-0155)	(197-0716)
1/16”	1.587 mm	(143-0154)	(197-0717)

For diameters below 1/16” use Graphmo Steel.  
 1/32” (0.38mm) (143-0149) (197-0713)

**Carbide Blade Set** includes one of each of those indicated (1” through 1/32”)  
 2” (50.8mm) Plunge (212-0000)      2” (50.8mm) Infeed (300-1270)      3” Plunge (76.2mm) (221-0000)      3” Infeed (76.2mm) (300-1271)

**Work Guides** used for throughfeed applications

**Model C**

<u>Imperial</u>	<u>Metric</u>	
1"	25.4mm	(067-0178)
1/8" (Std)	3.17mm	(052-0128)
3/32"		(067-0177)

<u>Imperial</u>	<u>Metric</u>	
1/16"	1.587mm	(067-0176)
3/64"		(067-0175)
1/32"		(067-0174)

**Model C6**

<u>Imperial</u>	<u>Metric</u>	
1"	25.4mm	(093-6144)
1/8"	3.17mm	(090-6120)
3/32"		(093-6143)

<u>Imperial</u>	<u>Metric</u>	
1/16"	1.587mm	(093-6142)
3/64"		(093-6141)
1/32"		(093-6140)

**Guide Risers** two required

<u>Imperial</u>	<u>Metric</u>	
1"	25.4mm	(060-0171)
1/8" (Std)	3.17mm	(060-0172)

<u>Imperial</u>	<u>Metric</u>	
1/2"		(060-0173)
1/4"	6.35mm	(052-0127)

**DedTru® Unit Tooling and Accessory Equipment  
For Larger Diameter Work**

**Model C**

**Special Work Blade Holder and Rest Assembly** allows through feed and plunge work to be performed on parts up to 4" diameter with 1/4" work blade and to 5" diameter with optional 1" blade. For these larger diameters check grinder to be sure proper wheel height is available.  
078-0000

**Model C6**

**Special Work Blade Holder and Rest Assembly** allows through feed and plunge work to be performed on parts up to 3" diameter with 1/4" work blade and to 5" diameter with optional 1" blade. For these larger diameters check grinder to be sure proper wheel height is available.  
092-0000

**Model PGF**

**Special Work Blade Holder and Rest Assembly** (2" regulating roll) allows plunge work to be performed on parts up to 5" diameter with optional 1" blade. For these larger diameters check grinder to be sure proper wheel height is available.  
224-0000

**Special Work Blade Holder and Rest Assembly** (3" regulating roll) allows plunge work to be performed on parts up to 5" diameter with optional 1" blade. For these larger diameters check grinder to be sure proper wheel height is available.  
230-0000

**Work Supports**

**Rest Plates** are used for throughfeed applications to support work as it approaches and leaves the regulating roll (standard equipment).  
052-0000 (Model C)  
090-6125 (Model C6)

**Steady Rest Assembly** is for grinding small diameter steps which are relatively long in length. The unit is of swivel construction with adjustable counterweight to control the supporting pressure.  
075-0000 (Model C)  
243-0000 (Model C6)

**Extension Arm and Roller Support Assembly** designed to facilitate throughfeed and plunge of grinding longer parts. Also add Dual Roll Feed Assist option 068-0000 for Model C, 096-0000 for Model C6.

- 081-0000 (Model C)
- 098-0000 (Model C6)

**Outboard Roller Support** for infeed grinding of longer parts.  
174-0000

**Work Pressure Rolls**

These units are for plunge grinding steps, forms, grooves or other secondary operations on either the OD or ID. They consist of one or more rollers that are spring loaded against and rolling on the part. They force the part into contact with the work blade and the regulating roll. Their attitude is adjustable to facilitate feeding the part against the end stop either in or out, according to the application requirements. For soft materials, to prevent marking, the nylon cover options should be ordered.

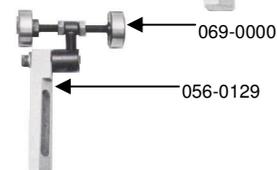

**Pressure Roll Assembly** supplied with one 1-1/4" diameter roll and one pressure arm. This Pressure Roll Assembly is used for parts greater than 1/8" diameter which is furnished as standard equipment with machine.

- 056-0000 (Model C & C6)
- 300-0387 (Model C & C6) complete with nylon cover (for use with parts of soft material)
- 378-0000 (Model PGF)
- 300-0396 (Model PGF) complete with nylon cover (for use with parts of soft material)

**Double Pressure Roll Assembly** supplied with two rolls, 1-1/4" diameter.

- 069-0000 (Model C, C6, PGF)
- 300-0156 (Model C & C6) Complete with arm to facilitate quick change over
- 300-0161 (Model PGF) Complete with arm to facilitate quick change over
- 300-0388 (Model C & C6) Complete with arm and nylon covers
- 300-0397 (Model PGF) Complete with arm and nylon covers

**Small Pressure Roll Assembly** supplied with one roll, 1/2" diameter used for parts smaller than 1/8"

- 070-0000 (Model C, C6, PGF)
- 300-0157 (Model C & C6) Complete with arm to facilitate quick change over
- 300-0162 (Model PGF) Complete with arm to facilitate quick change over
- 300-0389 (Model C & C6) Complete with arm and nylon covers
- 300-0398 (Model PGF) Complete with arm and nylon covers

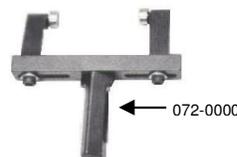

**Small Double Pressure Roll Assembly** supplied with two rolls, 1/2" diameter

- 071-0000 (Model C, C6, PGF)
- 300-0158 (Model C & C6) Complete with arm to facilitate quick change over
- 300-0163 (Model PGF) Complete with arm to facilitate quick change over
- 300-0390 (Model C & C6) Complete with arm and nylon covers
- 300-0399 (Model PGF) Complete with arm and nylon covers

**Horseshoe Double Pressure Roll Assembly** supplied with two 1/2" diameter rolls. This assembly is applied when it is desirable to capture the part at both ends and grind in the center. The rolls can be individually canted to push (for compression) or to pull so that very fine parts can be ground under tension.

- 072-0000 (Model C & PGF)
- 300-0391 (Complete with nylon covers)
- 222-0000 (Model C6)
- 300-0394 (Complete with nylon covers)

**Pressure Roll Arm** for use with all pressure rolls to facilitate quick change-over.

- 056-0129 (Model C & C6) standard, approximately 4"
- 078-0289 (Model PGF), approximately 6"

Pressure Roll Arms

**Nylon Pressure Roll Covers** for use with parts of soft material

- 200-0207 for standard rolls, 1-1/4" diameter
- 200-0208 for small rolls, 1/2" diameter

200-0208  
Nylon Cover  
Pressed on Pressure Roll

**Special Pressure Rolls** available for specific applications such as narrow rolls for use between spaced wheel etc. - Consult Factory

**Dual Roller Feed Assist** for throughfeed of longer parts up to 1-3/4" diameter. Requires extension arm and roller support assembly (see work supports).

068-0000 (Model C)

300-0392 Complete with nylon covers

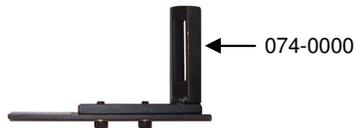

096-0000 (Model C6)

300-0393 Complete with nylon covers

**Infeed Slide Assembly** used for parts, which come to the machine with a head or other projection that prevents feed through grinding. The assembly replaces the pressure roll and its use allows the part to be ground round and true, in an infeed setup, regardless of its condition when it comes to the machine.

074-0000 (Model C, PGF)

374-0000 (Model C6)

**Work Stops** are supplied to locate the part end or shoulder to provide dimensional reference point.

Part Stop Carbide with 1/16" spherical radius brazed to cylindrical rod which is furnished standard with machine).

048-0157 (Model C)

090-6130 (Model C6, PGF)

**Roller End Stop** is used with parts, which have center hole, or other condition that prevents using a stop pin on-center. The part is fed into the stop by pressure rolls. The stop provides the reference point from which the ground surfaces will be located.

200-0205 (Model C)

093-6166 (Model C6, PGF)

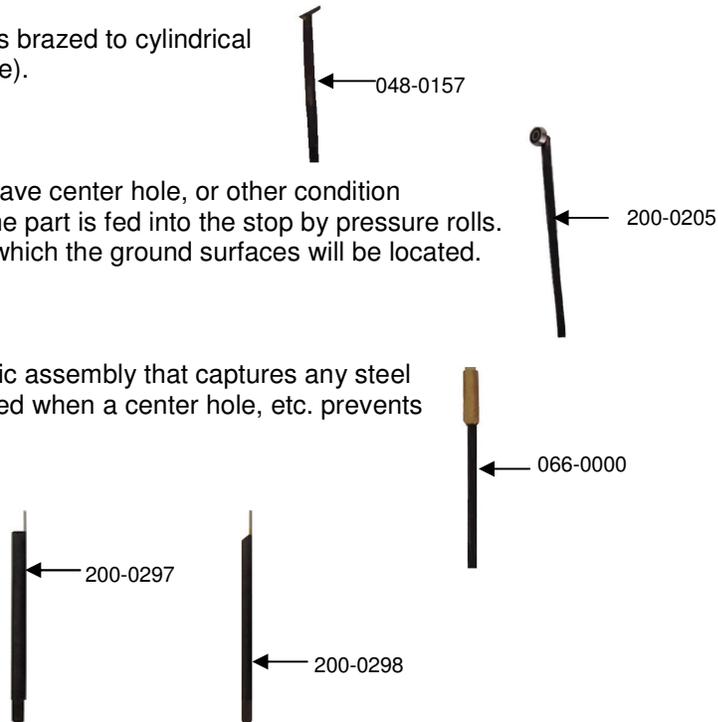

**Magnetic Ball Stop Assembly** is a magnetic assembly that captures any steel ball to locate the part end. This option is used when a center hole, etc. prevents the use of an end stop at part center.

066-0000 (Model C)

099-0000 (Model C6, PGF)

**0.03" Diameter End Stop** is a stop pin 200-0297 (Model C)

**0.06" Diameter End Stop** is a stop pin 200-0298 (Model C)

### Work Adaptors

**Collet Adaptor for 5C Collets** grips parts to facilitate grinding steps (requires 1" work blade). Overall length is 5-3/16" body, 2.00" diameter and 4.25" long. Ranges of sizes are 1-1/16" to 1-1/16" in 1/64" steps. Supplied less the collets.

083-0000 (Model c, C6, PGF)

**Double Ended Collet Adaptor** grips the parts on both ends for the grinding of steps with more accuracy. Useful on many applications. (requires 1" work blade) Overall length is 4-1/4", body 1.375" diameter and 3" long. The ranges of sizes are 3/16" to 1/2" each end in 1/64" steps. Collets are actuated by a hex nut. Collets are Universal 90500 series. Supplied less the collet.

084-0000 (Model C, C6, PGF)

**Collet Adaptor for 3AT Collets**

082-0000 - Consult Factory

## Coolant Accessories and Miscellaneous

\* **FilTru Tank and Filter Assembly** with an 15 gallon capacity which includes one roll of filter paper. Included on all complete DedTru Systems.  
079-0000

\* **FilTru Coolant Settling Tank** with an 18 gallon capacity. This is standard on all complete systems equipped with a Basic 6x18 Grinders.  
080-0000

\* **Splash Pan Guard Assembly**  
(specify make & model of surface grinder)  
116-0000

**Large Splash Shield**  
**288-0381**

**Filter Paper** 21" x 50 yards  
079-0306 one roll (minimum shipment, 2 rolls)  
300-1308 Case of 10 rolls

**Heavy Duty Coolant Pump Kit** (340 GPH in lieu of standard 170 GPH) If ordered with Model C or PGF Units includes heavy duty hose valve.  
232-0000 (when ordered with Model C or PGF)  
091-6429 (pump only)

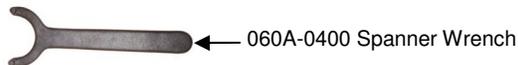

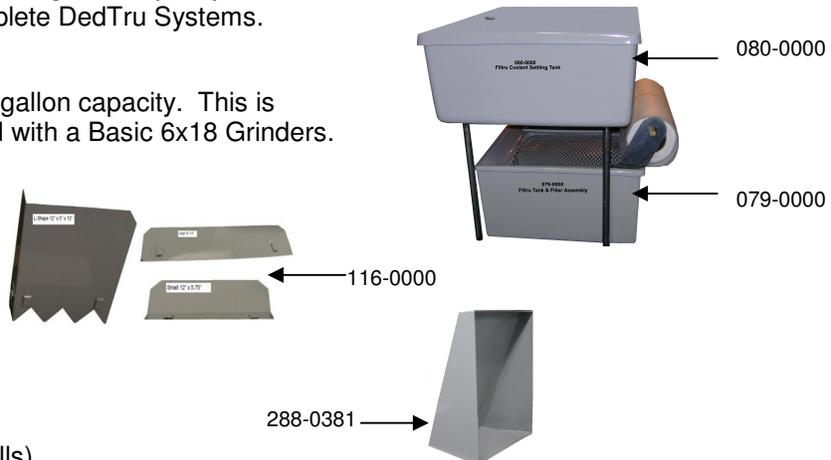

**Standard Coolant Pump** 170 GPH (pump only)  
060-0426

**Drain Hose** (4 foot section)  
116-1412

**Unilube Oil**  
124-1479 (per gallon)

**Wheel Puller Wrench** takes adaptor from spindle  
025-1255

**Spanner Wrench** tightens wheel on adaptor  
060A-0400

\* These items required when DedTru Units are purchased separately for mounting to existing surface grinders.

## DedTru Grinding Machine Options

The prices listed in this section covers machine modifications or accessories equipment which will increase the degree of automation, provides improved operating characteristics in certain respects or otherwise provide necessary features for a specific application environment.

These prices are applicable (unless otherwise noted) when options are purchased with DedTru Centerless Grinding Systems and DedTru Basic Grinding machines and in some cases to other makes of grinding machines.

Some of the DedTru Systems include one or more of these options as standard equipment. Please refer to the specific descriptive specifications to assure no duplication when ordering.

**Increased Height DedTru Grinder** basic grinder is supplied with 3" riser to increase spindle's maximum height. Required for larger parts. Available for all DedTru Centerless Grinding Product Line (except fixtures). Add "R" to model number (i.e. xxxRxxxx).  
XxxRxxxx for increased spindle heights, add ..... Consult Factory

**Heavy Duty 2 hp, 1800 rpm Spindle** to accommodate 14" wheels in lieu of standard 3600 rpm spindle. Includes spindle nut, woodruff nose key and 12-7/8" long steel barrel with heavy steel flange. (For 6 x 18 grinders only and requires option 288R-0000).  
100-2412 (in lieu of standard) ..... \$ Consult Factory

**Precision Spindle 3 hp, 3600 rpm** for 7" and 8" grinding wheels  
100-1404

**Fine Downfeed Attachment** 0.001" per turn (0.0001" graduation)  
300-0339

**Metric Fine Downfeed Attachment** 1.000mm per turn (0.002mm per graduation). Requires metric screw option (105-0425)  
300-0340

**Metric Screws and Sliprings** in lieu of standard  
105-0425

**Oscillating Crossfeed Mechanism** for improved finish and better control of wheel wear.  
102-0000  
1102-0000 (Metric)

**Automatic Longitudinal Feed Cycle** provides rapid approach to work, slow down to feedrate, feed to positive stop, dwell for preset time and automatic rapid carriage return. Slow down position, feedrate, positive stop and dwell time are adjustable. Includes limit switch which gives you start and stop control of regulating wheel.  
389-0000 (6 x 18 grinder)  
388-0000 (6 x 12 grinder)

**Automatic Vertical Wheel Feed Cycle** provides rapid approach to work, slow down to feedrate, feed to positive stop, dwell for preset time and automatic rapid wheel return. Slow down position, feedrate, positive stop and dwell time are adjustable.  
519-6 (6 x 18 grinder)  
1519-5 (Metric, 6 x 18 grinder)

**Limit Switch Control Assembly** starts regulating roll at the beginning of operation and stops the roll at the end of the operation. (Not required if Automatic Feed Cycle is ordered)  
\* 077-0000

**Lubrication Systems** is for extreme tolerances and finish. This option isolates the pump from the machine and cools oil to coolant temperatures.  
103-0000

**Digital Readout** is an 8 digit display, vertical and cross motion, with .00005" resolution.  
4322-0000

**Non-standard Electrical Equipment** - Refer to Company

**Wheel Guard Extension** is supplied in 1" increments for the varying widths. The standard equipment includes one wheel extension to accommodate a 2" wheel. For wider wheels order the necessary number of 1" increments to accommodate the wheel width.  
117-1

**TilTru Magnetic Chuck** 6" x 10", tilting and fits DedTru Model C sine base. Close pole permanent ceramic magnet and comes with two PT blocks. This chuck is instantly interchangeable with the DedTru Model C and PGF Units for conventional and angular precision surface grinding. For 6 x 12 grinders.  
107-0000

**TilTru Magnetic Chuck** 6" x 16", tilting and fits DedTru Model C sine base. Close pole permanent ceramic magnet and comes with two PT blocks. This chuck is instantly interchangeable with the DedTru Model C and PGF Units for conventional and angular precision surface grinding. For 6 x 18 grinders.  
108-0000

\*These items required when DedTru Units are purchased separately for mounting to existing surface grinders

**TilTru Magnetic Chuck** 6" x 16", for use with grinder equipped with 3" riser. Tilting and fits DedTru Model C sine base. Close pole permanent ceramic magnet and comes with two PT blocks. This chuck is instantly interchangeable with the DedTru Model C and PGF Units for conventional and angular precision surface grinding. For 6 x 18 grinders. (This model must be ordered for surface work with riser-equipped grinders)  
108R-0000

### Spindle Tooling (OD Work)

Grinding Wheels for customer's grinder (other than Unison's DedTru Grinder)

**Wheel Adaptors** 1-1/4", 16LH hardened and ground adaptors for precision mounting of wheels to spindle.

	Wheel Width (thickness)		Wheel Width (thickness)
119-1428	1/2	119-1430	1"
119-1434	1/2" Reversible	119-1477	1/2"
119-1435	1/2" Ext. Type	119-1431	2" (1-1/2" of thread)
119-1429	3/4"	119-1432	3" (1-1/2" of thread)

**Wheel Gear Nut Set** includes nut, washer and wrench for DedTru Grinders  
1127-0000 1-1/4" - 16LH  
2127-0000 1-1/4" - 16 RH  
3127-0000 1-1/4" - 18 LH

**Wheel Balancing Washer**  
122-0000

**Standard Wheel Guard Assembly** for up to 8" diameter  
114-1241

**Wheel Guard** for use with 12" to 14" diameter wheels for 6 x 18 grinders only.  
114-0000 (for 12" diameter wheels)  
For 14" Diameter Wheels - Refer to Company

**Balancing System**  
120-0000

### ID Spindle

**Speedgrind ID Spindle Attachment** – (207-00000) complete with 3/32, 1/8 Collect Bushing, 3/16, 1/4 Collet (spindle mounted), 1/4 x 2 Quill (mandrel) 3/8 x 1-5/8 (mandrel short), 3/8 x 2.00 Quill (mandrel long), two Wrenches 3/8 & 1/2, Wood Carrying Case. Developed for fast changeover from OD setup. Ideal for toolroom, short-lot job shop. The unit attaches to the machine spindle, is belt driven by the spindle at a speed of 18,000 rpm and utilizes transverse (cross slide) for work feed.

207-0456 3/32" Bushing	Quills for 3/8" ID Wheel
207-0458 3/16" Collet	207-0460 (long)
207-0465 1/8" Bushing	207-0461 (short)
207-0480 1/4" Collet	
	Belt for ID Spindle
Quills for 1/4" ID Wheel	207-0463
207-0459	

**Variable Frequency, Speed AC Motor Driven Spindle** is liquid cooled, 1.7 hp, 20,000 – 66,000 rpm for 230 volts, 50 or 60 hz. Supplied with 1/4" diameter collet suitable for maximum wheel diameter of 1.25" and equipped with bracket for mounting parallel to longitudinal.  
9921-1

**Variable Frequency, Variable Speed AC Motor Driven Spindle** is liquid cooled, 0.25 hp, 60,000 – 100,000 rpm for 230 volts, 50 or 60 hz. Supplied with 1/8" diameter collet suitable for maximum wheel diameter of 5/16" and equipped with bracket for mounting parallel to longitudinal.  
992-1

## Dressing Equipment

**Kooldress Diamond Dressing Tool** this triangular 1/2 carat impregnated, metal bonded diamond dressing tool is used to dress the face and both sides of the wheel. It can dress corners to 0.002" radius efficiently. Dresser is designed to force coolant at high velocity directly to the point of wheel and dresser contact. It eliminates wheel variations that result from uneven cooling of the diamond when conventional flood coolant procedures are used.

200-1022 each

300-1307 package of three

**Kooldress Dresser**, with Compensation this straight dresser is designed for manual dressing and truing procedures while providing automatic compensation for wheel size. It incorporates the Kooldress Diamond Dressing Tool (200-1022). This dresser is designed to minimize the time dress. The dresser mounts on the DedTru Unit. It has provisions for locating the diamond to the same height as the work being performed. A coarse adjustment is provided for quickly locating the approximate height of the diamond nib and a fine differential screw adjustment is supplied for the precise final position. After the dressing tool is located at the proper height, the table is moved longitudinally to bring the dresser to the wheel. The wheel is lowered the desired amount and the cross motion is then operated to dress.

242-0000 (Model C Unit)

Adaptors are available for use with Model C6 and PGF Units.

**Work Blade Re-Grind Wheel** a diamond wheel mounted and dressed on an adaptor for maintaining wear surface on carbide tipped work blades.

200-1076M

**Regulating Roll Dresser** a diamond wheel is mounted and balanced on an adaptor for use on machine spindle (for Model C, C6 and PGF DedTru Units)

200-1077

200-1077B for use with riser equipped machines

### Contour Dressing

**Radial Tangent Dresser** manually operates with concave radii adjustable from 0 to 4 inches, convex from 0 to 2-1/4 inches. (Larger radii available with optional dovetail extension) Listed less diamond.

300-0150

**Dresser Support Plate** required with ID and Plunge Grind Fixture to support Radius Tangent Dresser.

142-0000

**Powered Diamond Roll Wheel Dresser** – (425-1) for manual or automatic machine applications. This option includes the electric motor driven precision spindle, the elevating, cross motion and level adjusting mechanism for accurate alignment of the dresser. It includes provisions for the starting and stopping of the dresser. Coolant flow is maintained during all operations in order to equalize dresser roll temperature at approximately the same as that of the regulating roll and wheel. (Requires diamond roll of proper form. Refer to company) Installed at factory includes labor to modify DedTru Unit dependent upon application.

## UNISON CNC PRECISION GRINDING EQUIPMENT

**Model 1500** - Punch Master is an extremely rigid profile grinding system for round, non-round, standard and non-standard O.D. shapes and contours without the use of master cams.

**Model 8350** - Combination Cutting Tool/Burr Grinder is a turnkey 8-Axis CNC production grinder shipped with an automated loader, a tooling package, a self-contained coolant system and a complete package of our proprietary software which is included in the base price. Featuring state-of-the-art computer and hardware technology, which is capable of running in a "lights out" environment.

### FLEXIBLE GRINDING SYSTEMS (FGS)

**Model 2150** - CNC DedTru Grinding System

**Model 2050** - CNC Surface Grinder is a precision 3-hp, grinder for surface and profile grinding

**Model 2250** - CNC ID Grinder does standard grinding and for generating ID profiles

**Model 2350** - CNC TruCut cutter grinder is designed for use by small as well as large tool manufacturers for manufacturing or remanufacturing of end mills, carbide and HSS tools

**Model 2450** - CNC Roughing Cutter Grinder is a 5-HP machine designed for grinding the wave on the flute of a roughing end mill

**Model 2550** - CNC Special Punch Grinder is a profile grinder designed and programmed specifically for non-round, two-dimensional profiles. This punch grinder works well on slotted or keyhole type punches

**Model 2650** - Combination Cutting Tool/Burr Grinder is used by many of the largest manufacturers of dental and surgical burrs

### TRUFLUTE SYSTEMS

**Model 688** - TruFlute is a four axis, rigid, proven, helical grinding system specifically designed for the manufacture of both standard and special cutting tools.

**Model 4000** - Super TruFlute utilizes a system of round hydrostatic ways on the X, Y, and Z-axes and a massive "C" axis assembly, which virtually eliminates the possibility of machine deflection during the grind cycle.

**Model 9000** - Production Flute Grinder, when equipped with the optional fully automated loader, is an 8 axis turnkey grinder featuring an integrated 25 HP, direct drive, and dual-ended spindle with an operating range of 500 to 10,000 RPM.

You may contact any member of our Marketing Department at 248-544-9500 or [sales@unisoncorp.com](mailto:sales@unisoncorp.com) for information or a quotation on any of the above machines.
